# Part 12 Asbestos Control Requirements

## 1. Applicability of Part 12

You are required to follow Part 12 if you do any asbestos-related work at JSC, Sonny Carter Training Facility, or Ellington Field either as a civil service employee or a contractor. JSC field sites are required to follow equivalent requirements that also meet state and local regulations. All chapters and appendices of Part 12, listed in the table below, apply to any asbestos-related work.

Chapter	Tile
12.1	Introduction to Asbestos Control
12.2	Policy and Purpose
12.3	Asbestos Control Program
12.4	Regulations
12.5	General Asbestos Work Requirements
12.6	Notification Requirements
12.7	Competent Person
12.8	Asbestos Worker and Regulated Area Air Sampling
12.9	Regulated Areas and Site Preparation
12.10	Signs, Warnings, and Communications of Hazards
12.11	Wet Removal of Materials
12.12	Cleanup, Clearance Inspection/Air Sampling, and Release
12.13	Waste Disposal
12.14	Emergency and Mishap Procedures
12.15	Job-Specific Performance Requirements – General Information
Appendix 12A	Forms

### Part 12, Asbestos Control Requirements

Appendix 12B	Asbestos Job Performance Requirements and Asbestos Glossary Attachments:
	12A Class I Asbestos Work
	12B Class II Asbestos Work
	12C Class III Asbestos Work - Glovebag
	12D Class III Asbestos Work: Regulated Area Defined by a Barricade with Floor Covering
	12E Class III Asbestos Work: Regulated Area Defined by an Enclosure
	12F Class III Asbestos Work: Other
	12G Class IV Asbestos Work
	12H Asbestos Glossary

#### 2. What Part 12 covers

Part 12 specifies minimum acceptable standards and procedures for all JSC asbestos-related work.

#### 3. How to use Part 12

- a. Part 12 is designed to be self-implementing. It contains procedures for a variety of maintenance-, operational-, and construction-related activities. These procedures are defined under the appropriate OSHA class of asbestos work as defined in Chapter 12.4 or in 29 CFR 1926.1101, as amended.
- b. Each class of asbestos-related work has specific requirements for notification, protective equipment, regulated area systems and enclosures, and clearance inspections and monitoring. These requirements are discussed in Chapters 12.5 through 12.15 as well as the attachments to Appendix 12B. Controls have been defined for the protection of workers, work practices, and methods of minimizing asbestos release. Following these controls will also prevent the unnecessary exposure of building occupants to unacceptable concentrations of asbestos.
